WOODWORKERS DOUBLE GLAZED SINGLE LIGHT DOORS

Woodworkers double glazed doors offer an excellent combination of security, noise and solar control. The 16mm thick glass panels comprise two skins of toughened 5mm clear glass with a pyrolytic coating (LowE) to the inside. The units have desiccant spacers to prevent fogging in the argon gas filled center void. The panels reduce heat transfer by more than 50% and block infra-red and UV by more than 90%. They retain heat in winter; keep interiors cool in summer and provide brilliant noise reduction all year round.
