euro cylinders

what's so special about woodworkers dual function double euro cylinders?

Most insurance companies insist on a deadlock on all entries to a house. Conventional cylinders can only be operated from one side at a time however. If you leave a key in one side of the cylinder you can't open the lock from the other side so now you're locked out!

With a dual function cylinder however, keys operate from both sides independently allowing the inside key to act as a temporary turnsnib for convenience. This turnsnib capability makes access easy when you're at home and can be quickly removed to comply with insurance deadlock requirements when you're out. Dual function euro cylinders are a great design innovation and are included in all standard Woodworkers entry hardware kits.

woodworkers slide flush bolts do not interfere with the structure of mortice and tenon joinery

NOTE
other black tower and barrel bolt options are available in the gate hardware range.

woodworkers door accessories

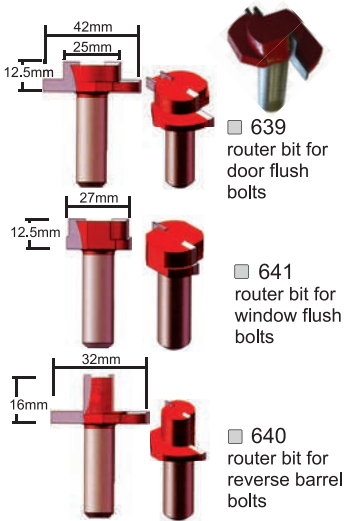

router bits

DO NOT USE lever arch flush bolts

WARNING

Woodworkers does not sell or recommend lever arch flush bolts because they require a large concealed back swing which severs the tenons that hold the door together.
