THE
WOODWORKERS
COMPANY

timber door + window hardware specialists

Woodworkers designs and imports its own branded hardware specifically suited to solid timber joinery applications. We also source selected hardware items domestically where available to offer our customers the widest range of options specific to door and window applications. Because there is no middleman in the majority of hardware we offer, we can invest in premium finishes and materials. Our PVD finishes, for example, never tarnish and much of our stock is built around a stainless steel core instead of brass or diecast zinc for more durable long term performance. Our black hardware range is the largest available anywhere in Australia. Most importantly however, the hardware range we offer is tried and tested over many years to perform on timber joinery.

PART 1

presentation pull handles

Woodworkers presentation door handle range is the largest and most innovative in Australia. We design and import products that we hope will stimulate your imagination. We continue to offer the widest range of materials and finishes that complement our industry leading range of fine timber doors to enable you to make your entrance highly individual.

- 3047S 900mm

WHAT'S THE DIFFERENCE BETWEEN 304 STAINLESS STEEL AND 316 MARINE GRADE?

316 Marine Grade has higher chromium content making it more resistant to discolouration. However all stainless steel can develop tea stain unless cleaned and waxed regularly. See FAQ 9 on our website for more information.

Got ideas?
We can make almost any timber handle design

Woodworkers custom manufacture timber handles to achieve various architectural effects in red cedar, rosewood, Vic. Ash or other woods on request using computer controlled CNC machining. Custom handles are fabricated for each specific application and can be moulded to an infinite variety of design options. POA

woodworkers door lock guide

ROLLER LOCKS

Roller locks restrain a door with a spring mounted roller shaped latch rather than a conventional wedge type latch that requires mechanical retraction. This allows the use of presentation pull handles (as no knob or lever is required) giving a contemporary uncluttered look. Like other locks there is an independent dead bolt to totally lock the door when required. Roller locks are available only with euro cylinder mechanisms and can be used in rebated door or single door applications.

EURO LATCH LOCKS

These are high security locks used on external doors suitable for modern euro cylinders. You can choose either a double-ended cylinder (where a key can be used from either end) or a thumb-turn cylinder (key for outside, thumb turn inside). They are morticed into the door stile so the lock mechanism is concealed from view. Euro cylinders can be masterkeyed as necessary to allow different access levels.

REBATED LATCH LOCKS

These are used when you have one door closing into another door, which is traditionally done on French Doors and Double Entry Doors. Rebated locks have a 13mm rebate in the face plate and strike and are available in Euro Lock, Skeleton Key Lock or you can use a Rebate Kit on a Tube Latch.

SLIDING LOCKS

Sliding or Parrot's Beak Locks are locks with claw hooks to grab onto the opposing striker plate to secure a sliding door. They can have flat or half moon faces (known as astragal) and can be used internally or externally with either euro cylinder or skeleton key operation.

SKELETON KEY LOCKS

These can be 5 Lever High Security Locks, to be used on external doors, or 3 Lever Low Security Locks to be used on internal doors. The difference between 5 Lever and 3 Lever Locks is the number of different key combinations available. These locks are supplied with a "skeleton" key. The main difference is that the 3 and 5 Lever Locks are more "traditional" for period homes but they cannot be master keyed.

RIM LOCKS

These are low security locks that screw to the outer surface of the door (as opposed to a mortice lock, which is "morticed" into the door). Rim Locks require knobs with a threaded spindle, where the knob screws onto the threaded spindle and is secured by grub screws. Rim Locks are suitable for inward opening doors only and are not suitable for rebated doors. They are also known as carpenter's locks.

DEADBOLTS

Deadbolts are part of most other lock varieties and are the bolt that locks the door, designed in conjunction with latch or roller mechanisms that restrain the door but don't lock it. Deadbolts are also available as separate mortice or surface mounted units for supplementary security.

DEADLATCHES

These latches can be retracted by a key from either side or a knob or lever from the inside only. They can be either rim or mortice locks.

TUBE LATCHES

This is used when the door doesn't need to be locked. It can be used with any type of lever or knob door furniture. Latch simply means you need a Tube Latch to make your door furniture functional.

PRIVACY LATCH

These latches can be used on Bedroom or Bathroom Doors. They have a thumb turn on one side and a safety release on the other side of the tubelatch.

CYLINDER LOCKS

Quick fit cylinder locks integrate the handle and lock into a single unit that can be master keyed and is easily fitted with only two drilled holes being required. They are available with knob or lever action and have variations for external and internal applications including privacy, keyed and non-keyed situations.

EASY FIT DEAD BOLTS

These are the simplest deadbolt to fix requiring two drilled holes and a surface mounted lock. They are available for single and double door applications.

ELECTRONIC + KEYLESS LOCKS

Smart locks have become popular because of the ease of installation and the amount of control it gives the owner. These locks don't need to be hardwired as they have batteries and can connect directly, or through a hub or bridge to your home WiFi. Depending on the model chosen you can control the lock via keypad, smartphone, tag, fingerprint or mechanical key. Smart locks can allow for remote locking and unlocking as well as over 100 permanent or time-controlled access codes. Mechanical keyless locks still have their place where WiFi or electricity isn't available.

PART 2

hardware kits

Woodworkers hardware kits make hardware selection simple and economical. All the components required are in a simple kit which is supplied keyed alike for convenience. All kits contain proven high quality hardware specifically engineered for our timber joinery that are bulk packaged to reduce costs.

lock + bolt morticing

Woodworkers provide a service to machine out lock pockets and flush bolt routings to suit our hardware only. Price does not include installation of the hardware but does cover the trenching for the lock body and plate as shown but NOT for the striker plate, cylinder or spindle holes which need to be done on site by others. This permits flexibility for both single and double sided hardware to be fitted on site to suit the application. When Woodworkers hardware is ordered a discount applies to the morticing as a package

Flush bolt routing is for Woodworkers own keyed or non keyed flush bolts only and does NOT include striker plate checkout and the installation of the flush bolts which is done on site by others

PART 3

hardware components

Woodworkers are door and window hardware specialists. This means we carry many products unique to our specialty that you won't find elsewhere. Many of these products we manufacture ourselves and others we buy in to ensure we offer you the widest range available. Our aim is to make outfitting timber joinery with attractive and coordinated hardware stress free and affordable.

- 864S 65mm
- 864G 65mm
- 864B 60mm
- 866S 80mm
- 866G 80mm

double cylinders not dual function

- 868S 90mm
- 868B 90mm

Most insurance companies insist on a deadlock on all entries to a house. Conventional cylinders can only be operated from one side at a time however. If you leave a key in one side of the cylinder you can't open the lock from the other side so now you're locked out!

With a dual function cylinder however, keys operate from both sides independantly allowing the inside key to act as a temporary turnsnib for convenience. This turnsnib capability makes access easy when you're at home and can be quickly removed to comply with insurance deadlock requirements when you're out. Dual function euro cylinders are a great design innovation and are included in all standard Woodworkers entry hardware kits.

woodworkers door accessories

router bits

DO NOT USE lever arch flush bolts

WARNING

Woodworkers does not sell or recommend lever arch flush bolts because they require a large concealed back swing which severs the tenons that hold the door together.

security isn't pricey... it's priceless

STEALSHIELD WINDOW PROTECTION

Stealshield panels provide affordable intruder, insect and bushfire protection and have the convenience of being easily openable for painting, cleaning and escape during emergencies. Stealshields are constructed of woven powdercoated stainless steel mesh with apertures less than 2mm to comply with bushfire regulations, encased in timber grain or white trim to blend unobtrusively with timber joinery.

5 GOOD REASONS WHY YOU SHOULD USE SIKKENS OIL BASED COATINGS

- As a natural oil-based coating it nourishes the timber while at the same time allowing it to breathe.
- It is very easy to apply and can easily be removed from glass etc when accidents occur.
- It is equally easy to re-coat over time without the need for the complicated etching required with plastic acrylic coatings.
- It has excellent longevity
- It 'lubricates' movement of the joinery items that need to slide against each other (eg double hung windows) rather than acrylic coatings which tend to stick together.

Queensland hardware pricelist

All prices are subject to change during the currency of this catalogue. Hardware and finish specifications were correct at the date of publication but may vary over time. Not all product will be held in stock at all times. Lead times may be required for non stocked items. Prices do not include keying alike, installation or delivery. A 15% restocking fee will apply to all stock orders returned for refund in merchantable condition. Product where original packaging is not intact is not returnable. All products bought in for specific orders are non refundable or returnable and payment is required in advance. Alternative non stock hardware products can be supplied by Woodworkers on a prepaid basis. All hardware has a 1 year mechanical warranty that does not extend to product finishes. Warranty details are on FAQ 9 at

Doors and windows are the eyes and ears of a building but the handles are its handshake...

The range of door hardware available on the Australian market is so extensive that it challenges even the most experienced hardware specialist. For someone not familiar with hardware, this can often result in hardware purchases that are not suitable for the application. Woodworkers have designed a range of hardware that aesthetically enhance your doors and windows, while providing all of the security functions you require.
